

ICSE90 + Physics

STUDY GUIDE:

FOLLOW THESE 6 STEPS FOR A HIGH SCORE :

STEP 1) Go through the CONCEPT BUILDER LECTURES first.

STEP 2) IMMEDIATELY study the CORRESPONDING literature from the textbook

based on the topics covered. Learn important definitions and practice important diagrams wherever necessary.

STEP 3) IMMEDIATELY study the EXPERT TEXTBOOK QUESTION SOLUTIONS PROVIDED BY US based on the topics covered.

Practice solving numericals both SOLVED and UNSOLVED from the exercises at the back of the book.

Note: There should be STRICTLY NO COMPROMISE WHATSOEVER OR TIME LAG

for steps 2 and 3 above.

STEP 4) Once the entire chapter has been studied along with steps 2 and 3, study the set of PREVIOUS YEARS' ICSE QUESTIONS PROVIDED BY US.

STEP 5) Supplement your study with regular and frequent revisions throughout.

Frequent revisions and practice numericals are highly essential for a high score.

STEP 6) Towards the end of your preparation, practice solving from OUR 8 FULL LENGTH PRACTICE QUESTION PAPERS under timed conditions.

Note: It is very important to take these question papers only after

you have fully prepared for all chapters.

Practice these question papers UNDER STRICT TIMED conditions ONLINE.
